

Q2 2026 SMARTWATCH AND CYCLING COMPUTER FEATURE UPDATE

In an ongoing effort to improve our products and provide enhanced features to existing users, we are excited to announce our next feature update for smartwatches and cycling computers. The update provides improved functionality and new features for a variety of our fitness and outdoor products.

The free software updates have begun rolling out and will continue to do so over the coming weeks. Customers can update their smartwatch or cycling computer by enabling automatic updates from their devices.

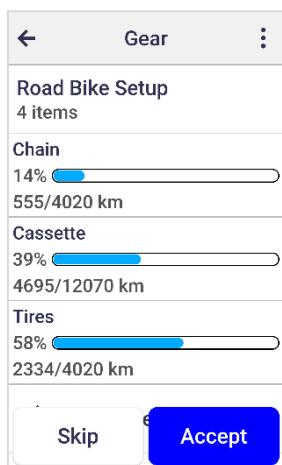

Please see the below for a few featured highlights found in this update as well as a detailed reference table at the end of the document.

NEW FEATURES

Notable features in this software release include:

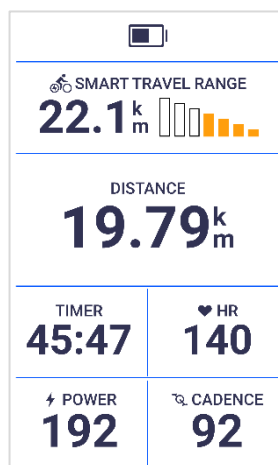

GEAR TRACKING ON YOUR EDGE® DEVICE

Assign and edit gear or gear collections directly from your Edge device for every ride to track the life of each unique bike setup — from drive train components and wheels to tyres and even the cleats on your cycling shoes. See progress bars on-device and get notifications, via the Garmin Connect™ app on your connected smartphone, when gear is approaching its end of life.

COMPATIBILITY FOR EBIKES WITH BOSCH SMART SYSTEM

If you ride a compatible eBike with a Bosch smart system, you can now wirelessly connect your Edge cycling computer to view your bike's battery status and smart range routing as well as your power and cadence data.
